27

Cerchia con il rosso la lettera ____.

Gli alligatori che vivono nell’America del Nord, nel Mississippi, sono i più grandi rettili di questa parte della Terra. Dato che sono ormai molto rari, sono stati dichiarati specie protetta. Possono essere lunghi fino a 6 metri e sono molto forti ma, nonostante ciò, non attaccano l’uomo se non si sentono minacciati.

27

Cerchia con il verde la lettera R/r.

Il castoro è un roditore che vive in acqua. Riesce ad abbattere rami e tronchi d'albero con i suoi denti molto robusti. L'accesso alla sua tana si trova sotto la superficie dell'acqua. Il castoro è stato cacciato dall'uomo per molti anni per la sua bellissima pelliccia marrone scuro. Il suo mantello è così spesso che l'acqua non riesce ad arrivare alla pelle.

27

Cerchia con il blu la lettera A/a.

Due secoli fa, il bisonte era la fonte di sostentamento fondamentale degli Indiani d'America. Per questo viene anche chiamato bisonte americano. Gli Indiani sfruttavano quasi tutte le parti del corpo di questo animale: la carne, la pelliccia, gli zoccoli, gli organi. Dopo essere arrivati in America, i bianchi iniziarono, lentamente ma inesorabilmente, a sterminare i bisonti.

28

Quante volte compare la lettera ____?

I serpenti sono rettili. I serpenti velenosi e i serpenti boa sono pericolosi anche per l'uomo. I boa possono essere lunghi fino a 9 metri. Essi non avvelenano le loro vittime, ma le stritolano. Se le prede sono più grandi della sua bocca, il serpente sposta la mandibola dalla sua sede e inghiottisce la preda tutta intera. Quanto più grande è l'animale, tanto più lungo è il tempo necessario per la digestione. Per tutto questo tempo, i serpenti non mangiano.

28

Quante volte compare la lettera S/s?

Il canguro è un marsupiale e vive in Australia. Quando nascono i piccoli, per prima cosa devono entrare strisciando nel marsupio; là si attaccano succhiando alla mammella della madre, per bere il latte. Soltanto quando sono abbastanza grandi lasciano il marsupio. Anche il koala è un marsupiale australiano e si nutre solo delle foglie di un unico tipo di eucalipto.
